

US Consumer Product Safety Commission Log of Meeting

Subject: CSA Technical Subcommittee Meeting on Domestic Gas Ranges

Date: April 15, 2021

Location: Teleconference

Prepared By: Chen-hsiang Su (csu@cpsc.gov, 301-987-2529), April 15, 2021

CPSC Attendees: Scott Ayers and Chen-hsiang Su

Non-CPSC Attendees: Contact CSA for a list of attendees

Summary of Meeting:

Contact CSA for more details on this meeting.

This was a meeting of the CSA Domestic Gas Ranges Technical Subcommittee (TSC).

The TSC reviewed the proposal for an Amendment to Z21.1/CSA 1,1; based on the RFC 'Hourly Btu Input Rating Marks on the Appliance'. The TSC voted to accept the proposal.

The TSC reviewed and discussed an Interim Proposal, ANNEX M.10.8.1, presented by the Smart Appliances Task Force. The TSC voted to send the proposal back to the task force for revision based on the discussions.

CPSC Staff proposed to form a task force to review gas range incident data (3 years of data, roughly 1800 incidents), and asked interested members to join the task force.

A Request for Change regarding Surface Temperature Measurement was presented by AHAM; the TSC voted to form a task force to review the request. Two more Requests for Changes regarding Nichrome Wire Test and Oven Rack Loading were also presented by AHAM; the TSC voted to approve both changes for public review publication.

The TSC reviewed and discussed another two Request for Changes regarding Vertical Flue and Front Discharge. The TSC voted that the two requests should both be revised and resubmitted.

The TSC recessed and will continue the meeting sometime in June 2021. CSA will send out a doodle poll to finalize the date and time.
